

Bagprep Dehydrated Media Bags

Applicable for Food, Beverage & Environmental Testing

Smart | Scalable | Reliable

Simplified Bulk Media Preparation

GVS Bagprep Dehydrated Media Bags are engineered to streamline large volume microbiological media preparation while reducing operational complexity.

Each sterile, lightweight bag contains pre-measured dehydrated culture medium designed for preparation of 20 liters of ready-to-use media.

Simply introduce purified water through the integrated inlet system, dissolve, and dispense.

No weighing

No glassware

No autoclaving cycles

Applications

- Food safety laboratories
- Beverage production facilities
- Contract testing laboratories
- Environmental monitoring programs
- Industrial microbiology labs

Advantages

Operational Efficiency

Eliminates manual weighing and sterilization cycles, reducing preparation time

Lower Preparation Costs

Reduces labor requirements, equipment usage, and energy consumption.

Consistent Performance

Controlled production ensures reliable formulation and reproducibility.

Safer Laboratory Environment

No powder handling exposure and no glass breakage risk.

Space Optimization

Compact storage compared to prepared media systems.

Workflow Compatibility

Compatible with peristaltic pumps, diluters, and automated dispensing systems.

How Dry Bags work?

1

Remove bag from the outer packaging and place on a stable surface

2

Insert sterile dry-bag filter (if applicable)

3

Connect the pump tubing to the inlet of the dry-bag filter

6

Close inlet clamp once volume is reached

5

Gently agitate until powder is fully dissolved

4

Fill to required volume (20 L per bag)

7

Connect dispensing equipment (peristaltic pump or diluter)

8

Connect pump/diluter with bag connector, open clip to start flow.

9

Dispose of empty bag according to laboratory waste procedures
